

Thank you for purchasing Anything Tabs. This guide will get you started using your new tabs.

- ✓ **Step 1:** Install the plugin in the same manner that you install all other Joomla extensions:
Admin – Extensions - Install/Uninstall. Browse for the plg_anythingtabs_J15.zip and click install.
- ✓ **Step 2:** Configure the plugin to meet your needs:
Go to Extensions – Plugin manager. Locate the Anything Tabs plugin and click on it to edit.
- ✓ **Step 3:** Configure as needed. Choose your theme, image, add your links, alt text and title.
- ✓ **Step 4:** Publish the tabs you want to be displayed on your site and make sure the plugin is published.

Your tabs will appear on your site like the diagram on page 2.

Meaning if you only want to use one tab, publish number 6 if you wish for it to appear at the bottom of the screen.

ADDING YOUR OWN TABS

Using the provide source files, you may wish to create your own tabs. After you have your tab created, upload it to the following folder: http://www.yoursite.com/plugins/system/anything_tabs/tabs/default/

Your new image will appear in the image list in the plugin parameters.

Choose “default” for the theme and your new image will appear in the image list.

All tabs are 37 x 37. If you wish to make your tabs a different size of change their position, you will need to edit:
http://www.yoursite.com/plugins/system/anything_tabs.php

Parameters
